

What's happening in the news this week?

Let's have a look at this week's poster!

11th - 17th December 2023

What is rubbish?

Let's look at this week's story

British litter-pickers have become world champions in the litter-picking World Cup (also known as the SpoGomi World Cup) after sifting through nearly 60 kilograms of rubbish in the Japanese capital to win the first-ever contest of its kind. The British team, made up of Sarah Parry and brothers Alexander and Jonathan Winship, beat teams from 20 other nations from around the world. SpoGomi is named after a combination of 'sport' and 'gomi', the Japanese word for rubbish. Each team is equipped with protective gloves, metal tongs and waste bags, and allocated an area of five square kilometres (nearly two square miles) in the busy Shibuya district of Tokyo, to collect as much litter as possible.

This week's story looks at events related to ...

Read the information below explaining more about the litter-picking World Cup held in Tokyo.

What is SpoGomi?

SpoGomi is competitive litter collecting. Teams of three players collect items of rubbish within a playing area. They have 1 hour to pick up any rubbish they find, and 20 minutes to correctly sort it. Teammates cannot be more than 10 metres apart from each other and they are not allowed to run. Points are rewarded for both the amount of waste collected and what kind of waste is collected.

The countries that held qualifying tournaments.
Source: SpoGomi World Cup website.

What is the SpoGomi World Cup?

The first-ever SpoGomi World Cup brought teams from all around the world to take part in the international competition. Its aim is to find who could be the best in the world at collecting and sorting rubbish found on the streets.

Who won the competition?

The first SpoGomi World Cup was won by the UK team, who were named, 'The North Will Rise Again'. They won with a score of 9,046.1 points, collecting 57.27kg (126.26 lbs) of rubbish, outperforming the Japanese hosts, who came second.

Do you think this event is a good idea? Is it something you would like to take part in?

Look at the resource below, which shares some of the different things people might do with their rubbish.

Recycle

Some items made from materials such as plastic, paper, and glass can be made into a material you can use again.

Put it in the bin

Sell it or give it

Items you no longer need or want can be passed on to someone, sold or given to charity rather than being thrown away.

Reuse

Use it again instead of throwing it away.

Upcycle

Making something you can't use anymore into something new.

Mend or repair it

Can you think of anything else you might do with your rubbish?

Look at the resource below, which shares some of the ways people are encouraged to dispose of their waste.

Charges and fines

Disposing of some rubbish incorrectly is illegal. Some workplaces may have waste products that contain medicines or toxic liquids that once used, need to be incinerated. Other workplaces have waste products that must be taken to recycling centres or collected by waste disposal companies.

Pictured: a chair that is no longer needed has been deposited on land it should not have been. This is called fly-tipping and is illegal. Fly-tipping can result in a fine or a prison sentence.

Bins for sorting rubbish in public areas

Many public places encourage people to sort their waste as they dispose of it by having different recycling bins available.

Awards and recognition

Some schools, workplaces or businesses apply for awards to recognise their effort to reduce, reuse and recycle. Sometimes people may be celebrated in their local area for things such as campaigning to reduce waste, litter picking or recycling.

Can you think of any other ways to encourage people to dispose of rubbish responsibly? What would encourage you?

What is rubbish?

Reflection

Rubbish left on our streets and in our countryside can be a real problem. Everyone can play a part in ensuring waste is disposed of correctly.

Individual Liberty

We can choose what we do with our rubbish. Some of our choices and actions can have a more positive impact on the environment and our health than others.

Protected Characteristics

The way we dispose of our waste can form part of our beliefs: our life choices or the way we live our life. We should never be treated unfairly because of our beliefs.

Sex

Sexual Orientation

Age

Disability

Gender Reassignment

Marriage and Civil Partnership

Pregnancy and Maternity

Race

Religion and Belief

UN Rights of a Child

We have the right to clean water, healthy food and a clean and safe environment to live in. Disposing of rubbish in the correct way can help to do this.

Useful vocabulary

Allocated

Given.

...and **allocated** an area of five square kilometres (nearly two square miles) in the busy Shibuya district of Tokyo.

Combination

Mixture.

SpoGomi is named after a **combination** of 'sport' and 'gomi', the Japanese word for rubbish.

Dispose

Throw away.

What are some of the different ways we can **dispose** of things we no longer need?

Equipped

Provided with equipment.

Each team is **equipped** with protective gloves, metal tongs and waste bags.

Outperforming

Being more successful.

They won with a score of 9,046.1 points, collecting 57.27kg (126.26 lbs) of rubbish, **outperforming** the Japanese hosts, who came second.

Sifting

To examine thoroughly to find **something** or to **separate** what is **useful** from what is not.

British litter-pickers have become world champions in the litter-picking World Cup after **sifting** through nearly 60 kilograms of rubbish in the Japanese capital.

Can you use them in your writing this week?

Picture News

What is rubbish?

British litter-pickers have become world champions in the litter-picking World Cup (also known as the SpoGomi World Cup) after sifting through nearly 60 kilograms of rubbish in the Japanese capital to win the first-ever contest of its kind. The British team, made up of Sarah Parry and brothers Alexander and Jonathan Winship, beat teams from 20 other nations from around the world. SpoGomi is named after a combination of 'sport' and 'gomi', the Japanese word for rubbish. Each team is equipped with protective gloves, metal tongs and waste bags, and allocated an area of five square kilometres (nearly two square miles) in the busy Shibuya district of Tokyo, to collect as much litter as possible.

- Look at this week's poster image and describe what you can see. What do you think could be happening?
- Read the information found on the assembly resource explaining more about the litter-picking World Cup held in Tokyo. Share your thoughts on the event. Is it something you would enjoy taking part in?
- Watch this week's useful video, which explains the competition rules. Do you think they are fair? Why?
- Do you feel making rubbish collection and sorting into a competition in this way will encourage people to litter pick more often?
- Talk about some of the reasons why you believe people don't get rid of their rubbish properly. Do you think that more could be done to try and help people learn about how and why they should?
- What are some of the different ways we can dispose of things we no longer need?

Reflection

Rubbish left on our streets and in our countryside can be a real problem. Everyone can play a part in ensuring waste is disposed of correctly.

Picture News

KS1 focus

What should we do with different types of rubbish?

- Our rubbish is all of the things that are waste material or are no longer needed. Make a list of some of the items you might throw away or no longer need at school and at home.
- Look at resource 1, which shares some of the different things people might do with their rubbish. Can you think of anything else you might do with your rubbish?
- What do you do with your rubbish? Discuss what you might do with each of the items from your list. Do you recycle items at home and at school?
- One of the suggestions from resource 1 is to mend or repair items instead of throwing them away. Have you ever broken a toy or device? What did you do with it?
- If possible, have a look at the items in your classroom bin or discuss the items you have already put in it today. Could any of the items be taken out of the bin and used in a different way? What might your pencil sharpenings be used for? A craft, to make compost, for pet bedding?
- Sometimes rubbish can end up in places that it shouldn't be and can cause harm to wildlife and the environment. Discuss examples of this. Have you ever seen rubbish that has not been disposed of properly? Where and what was it?

Reflection

We can choose what to do with our rubbish. Some of the ways we get rid of it can have a more positive impact on our world than others.

Picture News

KS2 focus

What are some ways to encourage people to dispose of rubbish responsibly?

- Look at this week's question. Discuss what your definitions of 'encourage', 'dispose' and 'responsibly' are. Does everyone agree?
- Discuss some of the benefits of disposing of rubbish responsibly e.g., reduce pollution, keep areas clean and tidy, and minimise pest infestations.
- Were you aware that not disposing of rubbish responsibly could negatively impact the environment and our health and well-being? How does this make you feel? Does knowing this encourage you to dispose of rubbish responsibly?
- Look at resource 2, which shares some of the ways people are encouraged to dispose of their waste. Can you think of any other ways to encourage people to dispose of rubbish responsibly? What would encourage you? Is everyone encouraged by the same thing?
- Everyone is different. Some people may respond to laws and sanctions better than rewards and recognition. Discuss the value of having a variety of ways to encourage people to dispose of rubbish responsibly.
- How important is raising awareness in this situation? What impact will it have on encouraging people to dispose of rubbish responsibly?

Reflection

If not disposed of responsibly, rubbish can cause harm to the environment and our health and well-being. Sometimes being aware of the negative impact our actions can have can encourage us to change them.

KS2 follow-up ideas

Option 1

Share the following rubbish statistics from litterbin.co.uk:

Almost 48% of people admit to dropping litter.
70% of discarded litter is food packaging or wrappers.
Black bags full of household rubbish account for 63% of all fly-tipping.
95% of farmers say that they have cleared up other people's dumped rubbish from their land.

- Record each percentage as a fraction and a decimal fraction in their simplest form.

The amount of litter dropped each year in the UK has increased by a massive 500% since the 1960s.

- Can you explain what this means? If the amount of rubbish was 250,000 pieces in the 1960s, how many is it now?

Option 2

Organise a litter pick at school or in your local area. Think about:

- When will you do it?
- Who will take part in it?
- What equipment will you need?
- What potential hazards are there?
- How will you reduce the risk of these hazards?
- What will you do with the litter once you have collected it?

KS1 follow-up ideas

Option 1

Design and make a poster to encourage people not to litter. Think about:

- What words will you use?
- What picture will you draw?
- What might people do with the litter instead?
- Where will you put your poster?

Option 2

Some of the materials we can recycle include glass, metal, paper and some plastic.

- Can you see anything in your classroom made from glass, metal, paper or plastic?
- Can you name any items you throw away that are made from glass, metal, paper or plastic?

Many of the containers or wrappers our food comes in are made from glass, metal, paper or plastic. Split a piece of paper into four and label each section as glass, metal, paper, plastic. Draw pictures or write some of the food that uses containers made from each of the materials.

Picture News Peace Chains

Pictured: Bodnant School pupils with their peace chain.
Source: Mrs Siân Canty Editor -Bodnant Bugle Ysgol Gymunedol Bodnant Community School.

This month, we have launched our Picture News 'Let's Spread Peace' campaign. The campaign aims to spread peace by asking you to make your very own peace chain, with each link in the chain representing an action you feel will help to spread peace far and wide! In the past few weeks, you have amazed us by sending in photos of your fantastic creations! We believe that small acts of kindness help us spread peace in our communities and homes and can make a real difference. So, we have absolutely loved seeing what you have been making so far and hope to see more.

Mrs Siân Canty, editor at the Bodnant Bugle, Ysgol Gymunedol Bodnant Community School, sent in the above photo of their pupils' work and said, 'Our school newspaper reporters have been busy on the run-up to Christmas writing and drawing on a peace chain which is now on display on one of the Christmas trees in school. Bodnant School have asked each of our children to design a link in the chain to send peace and goodwill to all at this time of year.'

Are you creating a peace chain? If you are, we would love to see your photos too!

Rare Rhino Baby Born

Chester Zoo has been celebrating the birth of a critically endangered eastern black rhino. The female rhino was born on soft sand during the daylight hours (14:45) on 12th November, and is reported to be doing very well along with her mother, Zuri. Commenting on the amazing event, rhino team manager Emma Evison said, 'We'd been eagerly awaiting this birth for 15 long months and, as it's quite unusual for a rhino to give birth in daylight hours, we really didn't expect it to happen right in front of us as we were going about our day. To be able to witness the calf safely entering the world, in front of our very own eyes, was just the most incredible privilege.' Only around 600 eastern black rhinos are estimated to be living in the wild in Kenya, Tanzania, and Rwanda. Scientists

believe that births like this one will help prevent the species from being lost altogether. 'This precious newborn's arrival is another positive step in safeguarding the species, which is what the endangered species breeding program in European conservation zoos, that we're a leading part of, is striving to do,' explained Evison. Chester Zoo is inhabited by over 27,000 animals, they say; 'We love wildlife. We care about nature. And we want to be the BEST ZOO in the WORLD!'

A black rhino's skin can be up to 5cm thick, they are smaller than white rhinos and they use their hooked lip to pluck at bushes and branches for food.

Do you know any facts about rhinos? Have you ever seen a rhino?

Pictured: Eastern black rhino Zuri and her new calf.

Tumbleweed Snowman

A giant tumbleweed snowman has been installed at the side of the I-40 (a motorway) in Albuquerque, New Mexico in the United States. The Albuquerque Metropolitan Arroyo Flood Control Authority (AMAFCA) has organised for the snowman to be displayed for the festive period every year since 1995. The snowman is spray-painted white and has eyes made from large, metal buttons, an orange-painted axe handle nose, workman's gloves for hands, part of a 55-gallon steel drum for a hat, a scarf and a big smile. Writer Jessica Dyer released a poem to explain and celebrate the occasion, 'The tumbleweed snowman is here. As crews stood him up Tuesday morn, drivers playfully tooted their horns. The tumbleweed snowman is here. A holiday

fixture locals hold dear, he's been spreading cheer for 28 years. The tumbleweed snowman is here. Built with care by flood-control crews, he wears a hat, a scarf and big smile, too. The tumbleweed snowman is here. Since first created in '95, he's grown in renown and literal size. The tumbleweed snowman is here. Made of jumbo weeds found around town; that's to make sure he doesn't blow down. The tumbleweed snowman is here. Some say tumbleweeds are nothing but pests, but he's the way to use them the best. The tumbleweed snowman is here. He'll be on I-40 waving to you - at least until early 2024.'

Do you enjoy writing poems? Have you written one to celebrate an event?

Last week's topic:

Who is responsible for Antarctica?

Everyone because it's our planet.
Finn

We think the world's government and rulers...
Rodrigo and Kieran

We are responsible for it since climate change and all that stuff and that is melting Antarctica slowly melting hopefully it won't affect the earth too much.
Magnus

We should listen to David Attenborough because he is the person trying to save it and we should be using his ideas. The Prime Minister should also be helping.
Annie
